

You Build, We Protect!

HEGSEL® Corr 211

Two-component %100 solid
High-Tech Coating, based on
Hybridized epoxy

Highlights

- High chemical resistance to concentrated/diluted acids and alkalis across pH 1-14
- Temperature resistance from -50°C to +170°C immersed and +230°C non immersed
- Self-priming single coat system curing at ambient temperature
- Easy application by spray / brush / roller
- Long-lasting impermeability

Scope of Application

- Chemical tanks
- Process vessels
- Evaporators
- Scrubber units
- Condensers
- Distillation units
- Autoclaves
- Heat exchangers
